

```
In [ ]: import numpy as np ### from the readings I learned to find max through using
```

```
In [34]: a = np.array([2432, 25343, 12354, 1234, 2343])
```

```
In [35]: a.max()
```

```
Out[35]: 25343
```

```
In [32]: list = ["2432", "25343", "12354", "1234", "2343"]
```

```
In [36]: max(list) ### based on the list reading I played around with the order bet
```

```
Out[36]: '25343'
```
